

24<sup>TH</sup> INTERNATIONAL  
**SEAWEED SYMPOSIUM**  
19-24 FEBRUARY 2023  
**SEAWEEDS IN A CHANGING WORLD**  
HOBART • TASMANIA • AUSTRALIA • ONLINE

05 May 2022

## Share your seaweed expertise

Share your seaweed expertise with an international audience as part of 24th International Seaweed Symposium (ISS) in February 2023.

Interest in seaweed has never been greater – from blue carbon to new products, propagation techniques and health benefits.

The world's leading seaweed experts will gather to discuss the latest research and commercial developments at the International Seaweed Symposium from 19-24 February 2023, in person and virtually, in Hobart, Australia.

Those who have a specific area of interest are being offered the chance showcase that by organising a 'mini symposia' within the larger event. Ideas for pre and post-symposium workshops are also being invited.

Topics already included in the symposium [agenda](#) are diverse, and include cultivation, processing, biochemistry, taxonomy, ecosystems, product development and indigenous knowledge. Ideas beyond the nominated topics will also be considered.

The International Seaweed Symposium is hosted by the [International Seaweed Association](#). It has been dedicated to the research and development of seaweed and seaweed products for almost 70 years.

Expressions of interest in mini-symposia close on 1 June 2022. They can be emailed to [Catriona Hurd](mailto:Catriona.hurd@utas.edu.au) ([Catriona.hurd@utas.edu.au](mailto:Catriona.hurd@utas.edu.au)) or [Michael Borowitzka](mailto:m.borowitzka@murdoch.edu.au) ([m.borowitzka@murdoch.edu.au](mailto:m.borowitzka@murdoch.edu.au)). Proposals should include details of speakers and tentative presentation titles.

Pre and post conference workshop submissions close on 31 July 2022. Proposals can be submitted via [the ISS 2023 website portal](#).

For more information on the symposium or to sign up for the symposium updates visit [iss2023.net](http://iss2023.net).
